REASONS FOR ALLOWANCE

1. This is an Examiner's statement for reasons for allowance. The closest prior art of Wagner U.S. Pat. No. 5,742,845 discloses a data transaction system which communicate with a plurality of remote terminals to transfer information used to complete a transaction or compile a database.

IBM Technical Disclosure Bulletin discloses a security for routing based on link state algorithms.

JP02002032571A, Uchiyama Noboru discloses a device for monitoring store and ATM of financial institution.

However, neither Wagner nor IBM Technical Disclosure Bulletin and Uchiyama singularly or in combination fail to disclose the recited feature:

As per claims 1, 7 "wherein at least one first document includes indicia corresponding to a status of the transaction function device".

As per claim 12 "a transaction machine computer in operative connection with the transaction function devices, and further comprising machine software executable in the computer, wherein the software is operative to cause the computer to generate at least one HTTP record including indicia representative of the status of at least one transaction function device, and wherein the software further a server, wherein the first HTTP record is accessible through the server".

As per claim 16 " a communication connection in operative connection with the at least one computer in the machine, wherein the at least one HTTP record is accessible by a computer external of the machine through the communications connection".

As per claim 19 " a communications connection in operative connection with the server, wherein the communications connection is adapted to communicate the at least one HTTP record to a computer outside the machine".
